Software Engineer with over 3 years of experience specializing in JavaScript, React.js, and Next.js. Skilled in developing responsive, high-performance front-end applications using modern frameworks and a wide range of libraries to accelerate development and enhance user experience. Proven ability to build efficient, feature-rich web applications with clean, maintainable code, delivering projects that align with business objectives and user needs.

PROFESSIONAL EXPERIENCE

Innovura Company

Software Engineer

Remote, Saudi Arabia

Jul 2023 – Sep 2023

- Successfully developed part of the user interface for a nursery school website using Next.js.
- Leveraged Tailwind CSS to create visually appealing and responsive designs.
- Designed and implemented a robust PostgreSQL database, creating an Entity Relationship Diagram (ERD) to ensure efficient data management and integrity.
- Utilized Prisma ORM to establish a seamless connection between the website and the PostgreSQL database.
- Initialized and integrated the React Big Calendar library, Implement event management functionality, allowing users to add and manage events within the calendar.
- Leveraged NextAuth for authentication, integrating Google Provider for user authentication and enhancing the security of the website.
- Incorporated Shadcn/ui components into the website, enhancing the user interface with intuitive and visually appealing UI elements.
-

Freelancer

Front-end Developer

Homs, Syria

Dec 2021 – May 2023

- Collaborated with a team in developing a Teaching Institute Management Program using Java and MySQL.
- Collaborated with a team in developing an Android job search app in Java, integrated with Firebase. Enabled users to find jobs conveniently.
- Designed a gym website using React, featuring animations for enhanced user experience.
- Built a React-based cryptocurrency info site using external APIs for real-time data.
- Developed an AI-driven chat platform, allowing interactions with multiple AI models.
- Crafted a weather website using StepZen, GraphQL, Next.js for real-time forecasts.
- Created an e-commerce website using Next.js and Redux for shopping, delivering seamless user experiences and robust state management.
- Developed an e-commerce website for a makeup store, leveraging WordPress, WooCommerce, and Elementor. Designed to showcase products and facilitate seamless purchasing, this website contributed to an enhanced online shopping experience.

EDUCATION

Syrian virtual University
